Abstract of the Disclosure

~~A subject of the present invention is to find utility of a~~
A combination of a Rho kinase inhibitor and prostaglandins a
prostaglandin as a therapeutic agent for treating glaucoma. A
method for treating glaucoma comprising administering to a
patient pharmaceutically effective amounts of a Rho kinase
inhibitor and a prostaglandin. Actions The actions of reducing
intraocular pressure are complemented and/or enhanced ~~each other~~
by combining ~~the~~ a Rho kinase inhibitor with ~~prostaglandins a~~
prostaglandin. For the administration mode ~~[[,]]each drug~~ Each
of the Rho kinase inhibitor and the prostaglandin can be
administered in combination or in a mixture.
